Professional Summary

Backend-focused Full-Stack Developer with hands-on experience building and leading production-grade systems using NestJS, Spring Boot, and React. Founded and led development of two full-stack platforms (Sehat Setu, FACILE) from architecture through deployment, integrating authentication, payments, and microservices. Strong foundation in DSA, REST API design, and database architecture, with proven team leadership across technical communities.

Education

Guru Gobind Singh Indraprastha University, Delhi Technical Campus Expected Graduation - June 2027
Bachelor of Technology in Computer Science (CGPA: 8.53) Noida, Uttar Pradesh

Experience

Assetzilla Pvt. Ltd. January 2026 – February 2026
Backend Developer

- Developed and shipped backend features for the company's dashboard, fixing bugs and resolving reliability issues in a production environment
- Diagnosed and resolved backend service and website availability issues, collaborating directly with the engineering team during technical discussions and incident reviews

Google Developer Students Club Aug 2023 – June 2024
Core Technical Operations Team

- Organized and led technical workshops, coding events, and developer sessions, engaging 100+ students
- Designed and delivered project-based learning initiatives in collaboration with the core team
- Drove developer community growth through peer learning and knowledge-sharing sessions

Association for Computing Machinery Feb 2024 – Feb 2025
Core Team Membership Chair

- Directed recruitment and onboarding processes, evaluating candidates on technical and problem-solving skills
- Mentored contributors and reviewed technical projects, delivering structured feedback that improved code quality

Projects

SEHATSETU: AIML Powered Rural/Urban Healthcare Platform <https://sehat-setu-ai.vercel.app>

Founder & Backend Lead | Team Project

React, Vite, TypeScript, Tailwind CSS, Redux Toolkit, RTK Query, NestJS, PostgreSQL, Prisma, JWT, bcrypt, Python, FastAPI, OpenAI Whisper, GPT-4.1, HuggingFace Transformers, WebRTC, BullMQ, Redis, Razorpay, NodeMailer, Cloudinary, Google Maps API, Twilio, Docker, Docker Compose, GitHub Actions

- Conceived and led the team for Sehat Setu, an AI-powered rural telemedicine platform, from initial concept through architecture decisions
- Built the authentication, EHR, and compliance module using NestJS, PostgreSQL, and Prisma — implementing JWT auth with role-based access control and designing the core database schema
- Implemented DPDP Act 2023-aligned privacy features, including consent capture at signup and a "right to erasure" account-deletion flow, with secure password hashing via bcrypt
- Integrated Razorpay, Cloudinary, and Google Maps API into a RESTful NestJS backend for payments, file storage, and emergency hospital lookup

FACILE: Distributed E-commerce Microservices Platform <https://facile-shop.vercel.app>

Founder & Project Lead | Team Project

Java, Spring Boot, MongoDB, PostgreSQL, Supabase, Redis, React, Next.js, TypeScript, Tailwind CSS, JWT, OAuth, Razorpay, Maven, npm, Docker, REST APIs, Git, Cloudinary, Vercel, Render

- Proposed the idea for FACILE and led the team in designing and developing a distributed microservices architecture
- Engineered the Order & Cart microservice (Spring Boot, MongoDB), exposing REST APIs for cart operations and order life cycle management

- Built responsive Next.js/React interfaces with JWT-authenticated sessions and real-time backend synchronization across cart and order flows
- Integrated with Auth, Inventory, and Payment microservices via REST, resolving cross-service data contract mismatches and merge conflicts through direct coordination with feature teams

ECHORD: End-to-End Music Streaming Platform <https://echord-songs.vercel.app>

Team Project

React, Vite, Node.js, Express.js, MySQL, JavaScript, JWT Authentication, Google OAuth, REST APIs, Nodemailer, Backblaze B2, Capacitor, HTML, CSS, Git, GitHub, Vercel, Railway, Render

- Built a full-stack music streaming platform with secure authentication, playlists, and recommendation system
- Developed scalable REST APIs and database features using Express.js, MySQL, and Backblaze B2

Technical Skills

Languages: C++, Java, C, Python, JavaScript, TypeScript

Concepts: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Database Management System (DBMS), Operating Systems, Computer Networks, Software Engineering, System Design, Microservices Architecture, Polyglot Persistence, REST APIs, RBAC

Frameworks/Libraries: Spring Boot, Spring Security, Spring Data MongoDB, NestJS, Passport.js, React, Next.js, Tailwind CSS, Lombok

Databases: MongoDB, PostgreSQL, Redis

Tools: Git, GitHub, Version Control, CI/CD (GitHub Actions), Postman (API Testing), VS Code, MySQL, Docker, Docker Compose, Maven, npm

Certifications

Junior Software Developer — Amazon & Coursera, 2026

Soft Skills and Personality Development — NPTEL, 2025

Data Structures & Algorithms in C++ — LeanIn @ IGD TUW, 2024
